Release Date: 13/04/22

BPD Global Group awarded ISO 27001 Certification

[BPD Global Group](#) are pleased to announce that we have been awarded ISO 27001 certification across our entire business. ISO is the world's largest developer and creator of standards that specify worldwide requirements for products, services, processes, materials and systems. ISO 27001 is the international standard developed specifically for Information Security Management Systems, requiring that a company uses a systematic approach to managing sensitive information and ensuring data security.

We worked closely with [Safe Harbour consulting](#) and the British Assessment Bureau to build a comprehensive information management system that builds on our existing practices and exceeds the requirements laid out by the ISO 27001 standard. SafeHarbour will continue to work with us to continually improve our overall security posture.

BPD Global Group's ISO 27001 certification by the British Assessment Bureau recognizes that our implementation meets one of the most stringent international standards.

ISO 27001 comprises 14 detailed control categories including: information security policy, security organization, asset classification controls, personnel security, physical security, communication management, access controls, system deployment, continuity planning and compliance. For further information on ISO 27001, please visit: <https://www.iso.org/isoiec-27001-information-security.html>

As a Cloud service provider we take Information Security very seriously, and this certification endorses our approach. We have also adopted recent additional measures on Cyber Security as advised by the [UK NCSC](#). More information on these additional steps can be found here:

"As a provider of Cloud based Asset Management solutions that are delivered as service this certification is an important demonstration of our commitment to the highest standards of information security," said Kenton Turner Chief Technical Officer of BPD Global Group. "Not only does the ISO 27001 certification recognize our high security standards, but it lets our customers, partners and prospects know that we take the protection of their data extremely seriously."
