- Optimize your stock holding and remove ad hoc purchasing
- Understand the performance of your contractors
- Provide the owners the financial reports they ask
- for today
- Be ready for post warranty
- Sleep easy in the knowledge that your team and business are working to best HS&E practice
- Flex the way your teams and contractors work

Maximo for Offshore Wind Overview

The owners and operators of offshore wind farms and Offshore Transmission Operators (OFTOs) recognize the critical importance of an enterprise quality asset and work management system to support the operation and maintenance of offshore wind farms, whether under construction, operational, under warranty or out of warranty.

Maximo for Offshore Wind reflects BPD Zenith's 20 years of offshore asset management experience. With design input from industry experts such as *Generating Better* and BPD Client *London Array*, BPD Zenith is offering the Offshore Wind industry a compelling home-grown solution.

Built from IBM Maximo, the world's leading asset management system for critical operations, Maximo for Offshore Wind has been support by *GROW:OffshoreWind*.
