A FULLY MANAGED ENTERPRISE ASSET MANAGEMENT PLATFORM THAT FUTURE PROOFS YOUR BUSINESS

What benefits does MaxiCloud provide?

Benefits of the BPD MaxiCloud Solution Suite – the platform that future proofs your business:

- Fast track your asset management journey with reduced deployment time over traditional software and reduce your overall project costs by upto 30%.
- Functionally rich features help deliver bottom line improvements such as increased employee utilization, inventory reductions, improved customer service levels, and reduce risks by meeting your health, safety and other regulatory requirements - all in one package.
- Pre-configured industry accelerator solutions help reduce project development costs, shorten the time to “go-live”, and provide additional features/functionality for your users.
- Fully managed service means “peace of mind” for your business – you can relax knowing we monitor of all the infrastructure and software, and apply fixes and patches.
- Best practices and continuous improvements in security and backup/DR aspects keep you up to date and ensures business continuity.
- We are an ISO 27001 Certified solution provider with 24 x 7 support, ensuring that you are in safe hands with our global support team.
- We work with you to optimize your usage requirements and minimize un-necessary software costs.
- Simple fee structure.

What our clients had to say...

AiMs Services

“ 15 months ago, we had done everything totally manually, and we were struggling to understand what was happening out in the field, we now have 13,000 job plans, 12,000 preventative maintenance plans and we generate in the region of 30,000 work orders a month. We now have much better visibility of our data and we can give much more information out and enable us to manage our business and environment better. ”
